- 19:00 – 19:30 Group Workshop
- 19:30 – 19:45 Wrap up, Q & A
- 19:45 – 20:00 Lucky draw, Close

Abstract:

The concept of the Digital Oilfield has gained considerable traction in the Oil & Gas industry over the last decade. It is evolving into a much more value-based Decisional Oilfield focus that addresses such key asset KPIs as optimized production, increased recovery of resources, reduced costs and improved HSE performance. This workshop highlights one service company’s collaborative approach to implementation of the Digital Oilfield.

Who should attend:

Young Professionals who are currently working in the Oil & Gas industry such as Geoscientists, Petrophysicists, Reservoir Engineers, Production Engineers, Production Technologists, Completions Engineers, Field Engineers/Supervisors and Asset Planners. Students in related fields are also welcome.
